

Quill Calligraphy

I have made a very short video of me making a quill. See if you can follow the steps to make your own.

Here are a few extra tips.

- 1. Always use real ink for best results, but beware it stains!*
- 2. Always use a blotting scrap first before writing, in case you have too much ink on your quill*
- 3. Put your paper on a tilted board. This helps the ink run more evenly and the quill nib write neater.*
- 4. For calligraphy always write in downwards strokes where possible.*
